Gentlemen:

I wish to take this opportunity to express my extreme pleasure to your company for a project you completed for our Glendale Community College last month.

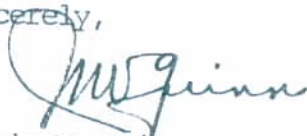

The project involved construction of eight classrooms in two buildings which were constructed on-site in eighteen working days.

Your office and field personnel were extremely qualified and performed in a manner seldom seen in this area of the country. It was like "Watching a Miracle take place."

The project was completed ahead of schedule with not one change order which is also a rare condition.

Please don't hesitate to use our District as a reference, we would be happy to recommend your firm for a similar project if called upon to do so.

Sincerely,

Martin W. Quinn
Construction Manager
Maricopa Community College District
